Student Name Two (BSCS-XX-XXX)

Student Name Three (BSCS-XX-XXX)

Semester, 20XX

Your Project Title Goes Here

A Final Year Project (FYP-II) report submitted to the Department of Computer Science & IT, Faculty of Information Technology, as partial fulfillment of the requirement for the award of the degree of BS (Computer Science).

Name	Registration Number
Student Name One	BSCS-XX-XXX
Student Name Two	BSCS-XX-XXX
Student Name Three	BSCS-XX-XXX

Supervisor:

Dr./Mr./Ms. Supervisor Name,
Designation, Department of Computer Science & IT,
The University of Lahore, Sargodha Campus, Pakistan

Co-Supervisor (if any):

Certificate of Approval

This Final Year Project report titled

Your Project Title Goes Here

Student Name One (BSCS-XX-XXX)

Student Name Two (BSCS-XX-XXX)

Student Name Three (BSCS-XX-XXX)

has been approved
for The University of Lahore, Sargodha Campus

Internal Examiner:_____

External Examiner:_____

Supervisor:_____

Dr./Mr./Ms. Supervisor Name
Designation, Department of Computer Science & IT

Project Coordinator / HoD:_____
Department of Computer Science & IT, The University of Lahore, Sargodha Campus

Declaration

We, Muhammad Noman Sohail (BSCS00000), Student Name Two(BSCS-XX-XXX) and Student Name Three(BSCS-XX-XXX), hereby declare that we have produced the work presented in this Final Year Project report during the scheduled period of study at The University of Lahore, Sargodha Campus. We further declare that we have not taken any material from any source except where referenced and acknowledged, and that the amount of similarity/plagiarism detected in this report is within the range accepted by the University and the Higher Education Commission (HEC). If a violation of HEC rules on research has occurred in this report, we shall be liable to punishable action under the plagiarism rules of the HEC.

Date: _____

Student Name One
BSCS-XX-XXX

Student Name Two
BSCS-XX-XXX

Student Name Three
BSCS-XX-XXX

Certificate

It is certified that Student Name One(BSCS-XX-XXX), Student Name Two(BSCS-XX-XXX) and Student Name Three(BSCS-XX-XXX) have carried out all the work related to this Final Year Project (FYP-II) under my supervision at the Department of Computer Science & IT, The University of Lahore, Sargodha Campus, and that the work fulfils the requirement for the award of the BS (Computer Science) degree.

Date: _____

Supervisor:

Dr./Mr./Ms. Supervisor Name

Submitted through:

Project Coordinator / Head of Department
Department of Computer Science & IT, The University of Lahore, Sargodha Campus

DEDICATION

*D*edicated

to our parents, teachers, and everyone who supported and guided us
throughout this project.

ACKNOWLEDGEMENT

First of all, we are thankful to Allah Almighty for giving us the strength and ability to complete this Final Year Project. We would like to express our sincere gratitude to our supervisor, Dr./Mr./Ms. Supervisor Name, for the continuous support, guidance, patience, and valuable feedback throughout the course of this project.

We would also like to thank the Department of Computer Science & IT, Faculty of Information Technology, The University of Lahore, Sargodha Campus, for providing the resources and environment necessary to carry out this work.

Finally, we are grateful to our families and friends for their constant encouragement and support throughout our studies.

ABSTRACT

Your Project Title Goes Here

Write your abstract here. State the problem being addressed, why it matters, a brief note on existing solutions/applications, the application you developed (key features and technology stack), how it was tested, and the main contribution or significance of your Final Year Project.

Chapter 1

Introduction

1.1 Background

Write the background of your project here.

1.2 Problem Statement

Write the problem statement here.

1.3 Motivation

Write the motivation here.

1.4 Project Objectives

- i. State objective one.
- ii. State objective two.
- iii. State objective three.

1.5 Scope of the Project

Write the scope and boundaries of the application here (what modules/features are included and what is explicitly out of scope).

1.6 Existing Systems / Related Applications

Discuss existing applications/products and how your solution differs or improves on them.

1.7 Development Methodology

Describe the software development methodology adopted for this project.

1.8 Report Organization

The remainder of this report is organized as follows: Chapter 2 presents the requirement analysis and specification. Chapter 3 describes the system design. Chapter 4 presents the implementation details. Chapter 5 presents the testing strategy and results. Chapter 6 concludes the report and outlines directions for future work.

Chapter 2

Requirement Analysis

2.1 Introduction

Briefly introduce what this chapter covers (requirement gathering approach: interviews, surveys, existing-system study, etc.).

2.2 Stakeholders

- **Actor 1:** description of role.
- **Actor 2:** description of role.

2.3 Functional Requirements

TABLE 2.1: Functional requirements

ID	Requirement	Priority
FR-01	The system shall allow a user to register/create an account.	High
FR-02	The system shall allow a user to log in with valid credentials.	High
FR-03	–	–

2.4 Non-Functional Requirements

- **Performance:** e.g. response time requirements.
- **Security:** e.g. authentication, data encryption.
- **Usability:** e.g. accessibility, supported devices/browsers.
- **Reliability/Availability:** e.g. uptime expectations.
- **Scalability:** e.g. expected number of concurrent users.

2.5 Use Case Diagram

Insert and describe the use case diagram here.

2.6 Use Case Descriptions

TABLE 2.2: Use case: Example

Use Case ID	UC-01
Name	Example use case name
Actor	Actor name
Description	Short description of the use case.
Pre-condition	State that must hold before the use case starts.
Post-condition	State after successful completion.
Main Flow	1. Step one. 2. Step two. 3. Step three.

2.7 Tools and Technologies

List the proposed technology stack (frontend, backend, database, hosting, APIs, etc.).

Chapter 3

System Design

3.1 Overview

Give a high-level overview of the proposed system architecture (e.g., client-server, three-tier, microservices, mobile app + REST API + database).

3.2 System Architecture

FIGURE 3.1: Proposed system architecture

Describe the overall architecture here.

3.3 Use Case Diagram Refinement

Refine/finalize the use case diagram from Chapter 2 if needed.

3.4 Class Diagram

Insert and describe the class diagram here.

3.5 Sequence / Activity Diagrams

Insert and describe key sequence or activity diagrams for critical workflows (e.g., login, checkout, booking).

3.6 Entity Relationship Diagram (ERD)

Insert and describe the ERD here.

3.7 Database Design

TABLE 3.1: Table: Example

Field	Type	Description
id	INT (PK)	Unique identifier
name	VARCHAR(100)	–

3.8 User Interface Design / Wireframes

Insert wireframes/mockups of key screens and briefly describe the UI/UX rationale.

Chapter 4

Implementation

4.1 Development Environment

Describe the hardware/software environment used for development (IDE, OS, frameworks, versions).

4.2 Technology Stack

TABLE 4.1: Technology stack summary

Layer	Technology
Frontend	–
Backend	–
Database	–
Hosting/Deployment	–
Version Control	–

4.3 Module-wise Implementation

4.3.1 Module 1: Name

Describe implementation details, key logic, and screenshots.

4.3.2 Module 2: Name

Describe implementation details, key logic, and screenshots.

4.4 Key Code Snippets

```
def example_function():  
    return True
```

LISTING 4.1: Example function

4.5 Third-Party APIs / Integrations

Describe any third-party services, APIs, SDKs, or payment gateways integrated into the application.

4.6 Challenges Faced

Discuss any significant technical challenges encountered during implementation and how they were resolved.

Chapter 5

Testing

5.1 Testing Strategy

Describe the testing strategy adopted.

5.2 Test Environment

Describe the environment/tools used for testing (e.g., Postman, JUnit, Selenium, PHPUnit).

5.3 Test Cases

TABLE 5.1: Test cases

Test ID	Req. ID	Test Steps	Expected Result	Status
TC-01	FR-01	Enter valid registration details and submit.	Account is created successfully.	Pass
TC-02	FR-02	Enter valid credentials and submit login form.	User is logged in and redirected to dashboard.	Pass

5.4 Test Results Summary

TABLE 5.2: Test results summary

Module	Total Cases	Passed	Failed
Module 1	—	—	—
Module 2	—	—	—

5.5 User Acceptance Testing (UAT)

Summarize UAT feedback if collected from end users/supervisor, and any resulting changes.

5.6 Discussion

Discuss overall test coverage, defects found and resolved, and remaining known issues (if any).

Chapter 6

Conclusion and Future Work

6.1 Conclusion

Summarize the problem, the developed application, and how it meets the objectives listed in Section [1](#).

6.2 Limitations

Discuss any known limitations of the current version of the application.

6.3 Future Work

Suggest possible extensions, additional features, or improvements for future versions of the application.
